## PROFESSIONAL EXPERIENCE |

### iOS Engineer Deliveroo

July 2018 – Present

London, UK

- Engineer on the consumer iOS app, focusing on building new features, managing releases and, triaging then fixing bugs.
- Using Objective-C and Swift with GraphQL.
- Contributed to launching new markets, adding support for right to left languages, adding menu allergen information and various A/B tests.
- Actively involved in supporting onboarding, recruitment efforts and community events.

### Campus Rep GitHub

March 2017 – June 2018

London, UK

- Used the training by GitHub to give talks and technical workshops to empower over 100 students on my campus.
- Represented GitHub at hackathons and conferences worldwide.
- Supported 8 other Campus Experts in the London region by holding office hours and an unconference to discuss how to better our communities.

### Software Engineering Intern Starling Bank

July 2017 – September 2017

London, UK

- Worked in the customer mobile team on the iOS app.
- Used Swift, SnapKit for creating layouts, and reactive techniques with RxSwift.
- Built an in-app widget to share bank account details, a general extensible solution to handle user-granted permissions and an integration with a 3rd party partner, Flux, to enable digital receipts.

### Voluntary Student Teaching Assistant City, University of London

January 2017 – April 2018

London, UK

Worked with the Department of Computer Science to provide additional support for the teaching of Java across 2 first year modules.

## EDUCATION |

### BSc (Hons) Computer Science City, University of London

September 2015 – July 2018

London, UK

Final year project included an iOS application which tracked and visualised raw sensor data alongside data from Apple HealthKit.

## SKILLS |

**Working knowledge of** iOS development (Swift), Git, Java

**Experience with** C++, Reactive Programming, Go, Objective-C, Node.JS, Ruby

## AWARDS |

### Best Society Event City, University of London Students Union

April 2018

City Tech Society was awarded the best society event award for our annual hackathon, HackCity. HackCity invited 120 students from around Europe who focused on learning new technologies, building projects and sharing.

### Best New Society City, University of London Students Union

April 2017

I co-founded City Tech Society to build a technical community on campus. We were awarded the best new society award for our work with the student body throughout the year.

### WWDC Scholarship Apple

May 2016

- Awarded a scholarship to visit Apple's developer conference in San Francisco after submitting an iOS application.
- The application used 3D Touch APIs with the AVFoundation and SpriteKit frameworks.

## INTERESTS |

- Film & Cinema
- Hackathons (github.com/abdulajet/hackathons)
- Teaching within Computer Science
- Functional Programming
