Experience

Deliveroo, London UK – *iOS Engineer*   July 2018 – Present

- Working on the consumer iOS app, using Objective-C and Swift with GraphQL.
- Contributed to launching new markets, adding menu allergen information and various A/B tests.
- Actively involved in onboarding, interviewing and community events.

GitHub, London UK – *Campus Rep*   March 2017 – June 2018

- Used the training by GitHub to give talks and technical workshops to empower over 100 students on my campus.
- Represented GitHub at hackathons and conferences worldwide.
- Supported 8 other Campus Experts in the London region by holding office hours and an unconference to discuss how to better our communities.

Starling Bank, London UK – *Software Engineer Intern*   July 2017 – September 2017

- Worked on the iOS app, which used Swift with RxSwift.
- Built an in-app widget to share bank account details, and an integration with a 3rd party partner, Flux, to enable digital receipts.

Skills

Working knowledge of iOS development (Swift), Git, Java
Experience with C++, Reactive Programming, Go, Objective-C, Node.JS

Awards

City, University of London Students Union – *Best Society Event*   April 2018

City Tech Society was awarded the best society event award for our annual hackathon, HackCity. HackCity invited 120 students from around Europe to our campus.

City, University of London Students Union – *Best New Society*   April 2017

Co-founded and led City Tech Society to build a technical community on campus. We were awarded the best new society award for our work with the student body throughout the year.

Apple – WWDC Scholarship   May 2016

Awarded a scholarship to visit Apple's developer conference in San Francisco after submitting an iOS application which used the 3D Touch APIs with AVFoundation and SpriteKit.

Education

City, University of London – *BSc (Hons) Computer Science*   July 2018
